BACKEND / FULL-STACK DEVELOPER | JAVA, SPRING & CLOUD

Professional Profile

Backend and full-stack developer with professional experience since 2024 building enterprise software. I work across backend development with .NET/C#, Java/Spring, and Node.js, and frontend development with React and Angular. My experience includes reactive systems, microservices, data integration, and event-driven architectures, applying DDD and Hexagonal Architecture across AWS, Azure, and GCP environments.

Core Competencies

- **Backend:** .NET, C#, Java, Spring WebFlux, Spring MVC, Node.js, Express, and REST APIs.
- **Frontend:** React, Angular, TypeScript, Redux, Tailwind CSS, RxJS, and micro frontends.
- **Architecture:** Microservices, DDD, Hexagonal Architecture, CQRS, SOLID, and event-driven systems.
- **Data integration:** Apache NiFi, Kafka, RabbitMQ, PostgreSQL, SQL Server, and MongoDB.
- **Cloud and observability:** AWS, Azure, GCP, Kubernetes, Docker, Grafana, Elastic Stack, and OpenTelemetry.
- **Agentic development and AI tools:** Claude Code, Codex, and GitHub Copilot.
- **Quality and delivery:** JWT, testing with JUnit and Mockito, GitFlow, Trunk Based Development, Azure DevOps, and use of GitHub Actions.

Professional Experience

Sofka Technologies

Medellín, Colombia, remote

Backend Developer

Oct 2026 - Present

- Joining a banking backend project using Java, Spring WebFlux, event-driven architecture, RabbitMQ, and Azure.

Full-Stack Developer

Jul 2026 - Aug 2026

- Contributed to a project centered on agentic development with Claude Code for an enterprise application using React, Redux, Tailwind CSS, Java, and Spring MVC.
- Worked with Hexagonal Architecture, PostgreSQL, Kafka, Docker, and Azure.
- Reviewed frontend, backend, security, and data implementations, adjusted code when needed, and validated increments before handing them over to QA.

Backend Developer

Mar 2025 - Jun 2026

- Developed reactive backend APIs and services using Java, Spring WebFlux, .NET, and reactive programming within microservice architectures.
- Implemented data integration and processing components with Apache NiFi, MongoDB, PostgreSQL, and SQL.
- Worked with RabbitMQ, CQRS, and Hexagonal Architecture, and implemented salted API-key authentication and caching strategies.
- Worked with Docker and Kubernetes across Azure, AWS, and GCP, including AKS, EKS, and GKE, and used Grafana, the Elastic Stack, and OpenTelemetry for observability.
- Used GitHub Copilot as a supporting tool during backend development.

Professional Experience (continued)

Sofka Technologies

Medellín, Colombia, remote

Full-Stack Developer

Nov 2024 - Feb 2025

- Developed features with React and Node.js within a micro frontend architecture and decoupled services.
- Worked on a serverless backend built with AWS Lambda and integrated with S3, SQS, and DynamoDB.
- Used CloudFront and CloudWatch for delivery, monitoring, and diagnostics, and applied Hexagonal Architecture to separate domain logic from infrastructure.

Software Development Apprentice

Feb 2024 - Jun 2024

- Completed hands-on full-stack training with .NET, Node.js, Angular, and React; developed reactive flows with Rx.NET and RxJS and real-time communication through WebSockets.
- Applied DDD and Hexagonal Architecture in solutions using MongoDB, SQL Server, Express, and Docker.

Public Projects

Reto-Sistema-Bancario

Banking backend with two independent microservices for clients and accounts. Java 21, Spring Boot WebFlux, R2DBC, PostgreSQL, RabbitMQ, Flyway, Gradle, and tests.

github.com/CReies/Reto-Sistema-Bancario

La Pinguinera

Quotation system for a bookstore built with .NET/C#, MongoDB, DDD, Hexagonal Architecture, Event Sourcing, reactive programming, and a REST API.

github.com/CReies/La-Pinguinera-Hexagonal

Education

Computer Engineering

Fundación Universitaria Internacional de La Rioja (UNIR) | *Jan 2023 - Jun 2027*

In progress, over 80% of credits completed. Expected graduation in June 2027.

Technical Certificate in Software Programming

Servicio Nacional de Aprendizaje (SENA) | *Jan 2019 - Nov 2020*

Initial training in programming, web development, object-oriented programming, and databases.

Languages

Spanish, native | English, B2
